## Considering Career Changes

Considering a change for a mid-career executive is a critical and often daunting decision, which requires a conscientious and well thought out assessment.

Like many things in life, a good opportunity may come when you're least expecting or prepared for it. Or the sudden need to change may be a result of corporate decisions entirely out of your hands. Or it might be entirely your initiative, for a new environment or challenge.

Whatever the impetus prompting your consideration to explore, it is important to understand your own personal drivers and motivations, so you can responsibly manage the change and seize on the right opportunity when it presents itself.
